## **Global: New Support Site**

Contributed by RobBrandt on Apr 14, 2006 - 05:51 PM

Welcome to the new Support Site for the Botanical Society of America. I will be using this site to manage various projects underway for the BSA and it's clients and affiliated organizations, and to "blog" information useful to others. This site will also be used as a test-bed for PostNuke v0.80, which is what you are looking at now. So, it may be unavailable from time to time. I apologize in advance...
